Re: Ben Shapiro

It is with great sadness that I write this letter. I believe the treatment of Ben Shapiro was clearly a case of discrimination. It was not discrimination by race or gender. It was more damaging than that. You have discriminated against the free dissemination of ideas.

The question then becomes why you discriminate against conservative thought. My simple theory is that the administration and faculty of our major bodies of higher education are fearful. They are fearful that once people like Ben Shapiro speak about their conservative ideas, the students will begin to understand a simple fact. It is the fact that they have been exposed to only one way of thinking and thus will be furious over having spent so much time and money only to find out that they have been essentially brain washed.

Because of this, I have decided to give my annual contribution for scholarship at the U of M to the Young Americans for Freedom.

An excellent example of how much damage you have done; I am not signing my name for fear of Political Retaliation.
